Industry Challenges We Solved

We have successfully addressed complex business challenges across various industries, delivering tailored solutions that drive operational excellence.

Industry Issues

- Inventory errors & stock mismatch
- Manual invoicing delays
- Disconnected ecommerce & shipping
- Complex delivery logic by region/SKU
- Legacy systems with poor integration
- Poor visibility across multiple locations

Our Solutions

- Automated inventory management & real-time tracking
- Streamlined invoicing through integrated workflows
- Seamless ecommerce & shipping integration
- Custom delivery & logistics automation
- Modern ERP with integrated modules
- Centralized reporting & multi-location visibility

Implementation Methodology

01

Analysis

Business process analysis, requirements gathering

02

Design

System architecture, module configuration

03

Development

Customization, integration, data migration

04

Testing

User acceptance testing, training delivery

05

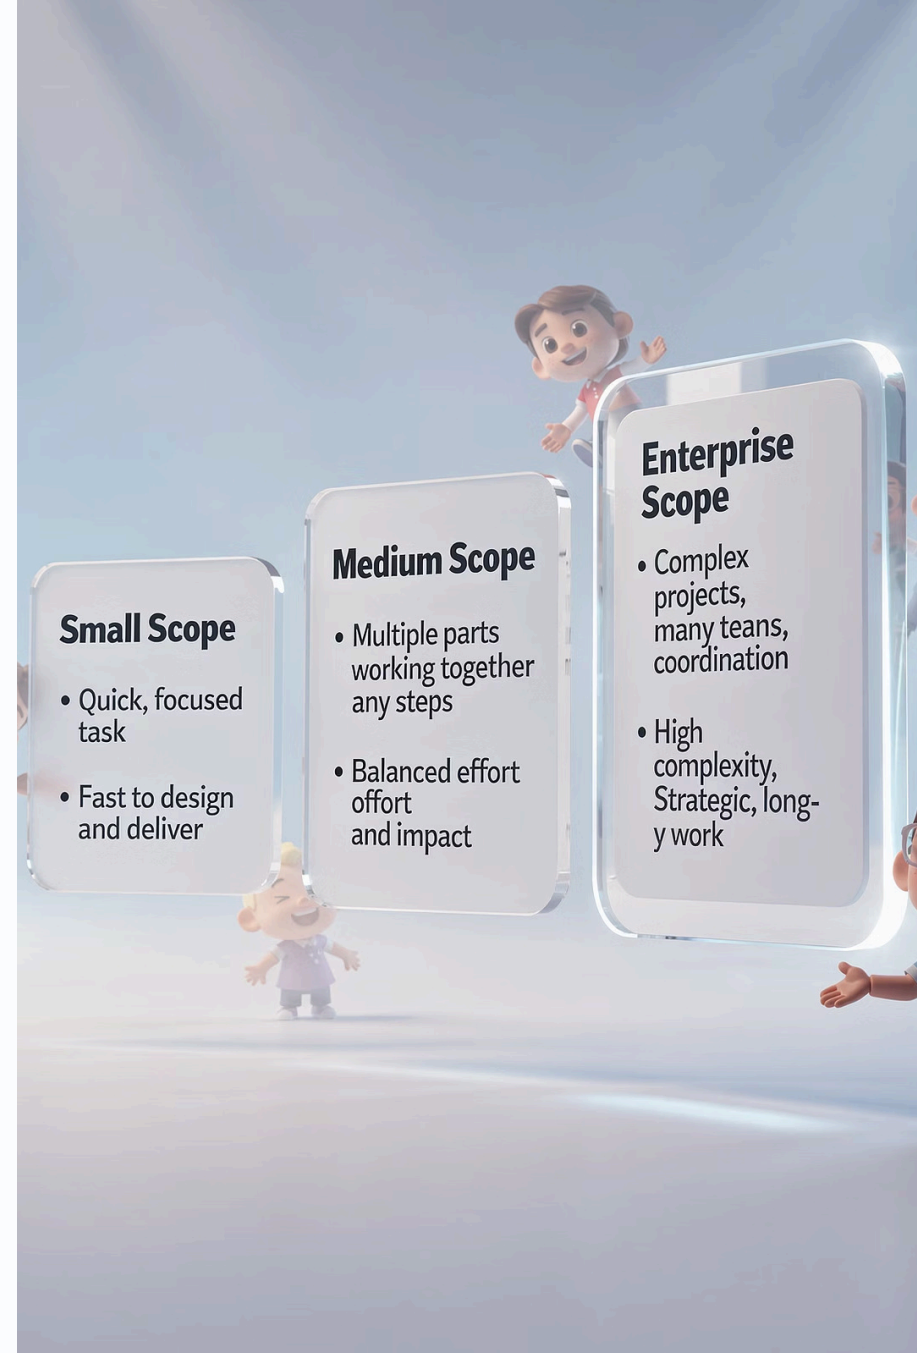

Support

Go-live assistance, ongoing maintenance

Estimation & Pricing

Flexible pricing structure based on project scope and complexity.

Hours Range	Rate (USD)	Description
0 – 50 hours	\$17/hr	Ideal for smaller modules and quick setups
51 – 150 hours	\$15/hr	Standard rate for medium-sized implementations
151 hours & above	\$12/hr	Discounted rate for extended development
