Opto Engineering® evaluation policy

Dear Customer,
Opto Engineering® (hereinafter referred to as "OE") is offering its Customers the possibility to request demo units to evaluate their characteristics and performance, in order to confidently choose the products that are best suited for a particular application.

Please, read carefully the following evaluation program terms and conditions:

1. The standard evaluation period is 4 (four) weeks from when the good are received. Extension requests may be accepted, but they must be submitted to the OE Account Manager and approved before the end of the standard evaluation period.
2. OE reserves the right to issue an invoice for demo units that are over 1 (one) week late, unless an extension has been approved.
3. Shipments (inbound and outbound) will be arranged using the Customer's shipping courier account. Where not possible, OE will use its carrier of choice and charge the Customer for the shipping cost. Import and export expenses (where applicable) shall be borne by the Customer.
4. Customers may request to purchase a demo unit at the end of the evaluation period. In the event that OE can't accommodate the request, the demo product will have to be returned. The Customer will be able to purchase a new unit by sending a regular purchase order.
5. Customers commit themselves to return the goods in the same condition as they were received and to ask their own customers to exercise the same care.
6. In case of loss of demo units, OE will have to invoice the Customer. OE strongly encourages Customers to add adequate shipping insurance to obtain full reimbursement for lost demo units.
7. In case of damaged items, OE will estimate the repair cost upon receipt of the damaged evaluation unit and will promptly notify the Customer. Customer will decide whether to pay for the repair or to purchase the damaged product. In case of purchase, delivery costs shall be borne by Customer.
8. Demo units are provided for evaluation purposes only and should not be used for commercial purposes. No warranty is given on demo units, except otherwise agreed with OE.

Please do not hesitate to contact your OE Account Manager for further information.
